

# STAINLESS STEEL – BLACK

**Collars made of Stainless Steel –  
Tradition in a new Look!**

**INFO:** The basis for this Herm. Sprenger innovation is generated from the well-known stainless steel product range conclusively submitted to a galvanizing process which colours the upper layer of the material. Thus the colour is not only on top but also in the substrate material which reduces the abrasion during usage considerably.

Numerous tests confirm the surface-behaviour in the manner described. Depending on the nature of the fur a long-life surface is achieved.

A warranty on color abrasion, however, cannot be granted.

In usage, the colour may lighten somewhat, respectively an "antique-look" arises. The quality is not affected by this optical change. Slight colour deviations from batch are due to the manufacturing process.

**Please watch out for the  
premium-quality seal!**

The special quality of our Stainless Steel products can be recognized by our metal tag with the red dot as well as the stamp HS-GERMANY INOX on all rings and swivels.

# Make your collar unique!

## Define your NECK-TECH according to your personal requirements and wishes!

Combine stainless steel, black stainless steel and Curogan, and also *Fun* or *Sport* links with one another to create a customised Neck-Tech that exactly matches your ideas and personal taste.

According to one's needs the single links of the *Sport* or *Fun* can be inserted into the collar, through which very precise and accentuated work with the dog can be realised. The ability to customise achieves harmony and confidence between the dog and handler during the educational phase in training.

**Optional combinations of**  
Stainless Steel,  
Black Stainless Steel  
and Curogan

**Selective combinations of "Sport" and "Fun"**  
individually optimized  
for your dog!

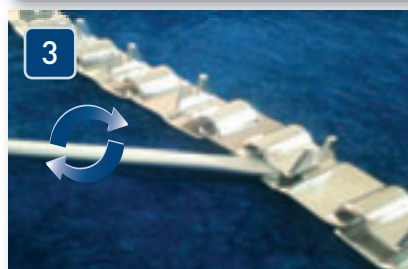

**SINGLE ELEMENTS**

	article-no.	←→ cm	quality	length cm	type
① - Stainless steel	50505	000	55	3	Sport
	50506	000	55	3	Fun
② - Stainless steel black	50505	000	57	3	Sport
	50506	000	57	3	Fun
③ - Curogan	50505	000	67	3	Sport
	50506	000	67	3	Fun

**NECK-TECH LENGTHENING/SHORTENING**

1. Please place the back of the Neck-Tech to a plane surface.
2. Insert a slot screwdriver into the gap of the bending.
3. Open the bending with turning the screwdriver as far as necessary to obtain a gap that allows to add or to remove a single element.
4. Close the gap to the original distance by using combination pliers.

# STAINLESS STEEL

**Collars made of Stainless Steel  
- Quality with Tradition!**

**INFO:** The known advantages must be the reason why competitive dog sport people and professional dog handlers increasingly choose stainless steel over the alternatives. Although the Herm. Sprenger collars made of stainless steel command a premium price compared to the standard steel chromium plated collars, the features such as toughness and high tensile strength accompanied by the improved safety aspect easily justify this discrepancy. This is a high performance product that is absolutely worth its price.

The outstanding quality enables Herm. Sprenger stainless steel collars to last over a dog's lifetime, and is often passed on to the next generation.

## Please watch out for the premium-quality seal!

The exceptional quality of our Stainless Steel products can be easily recognized by our metal tag with the red dot as well as the stamp 'HS-GERMANY INOX' on all rings and swivels.

# NeckTech

*fun*

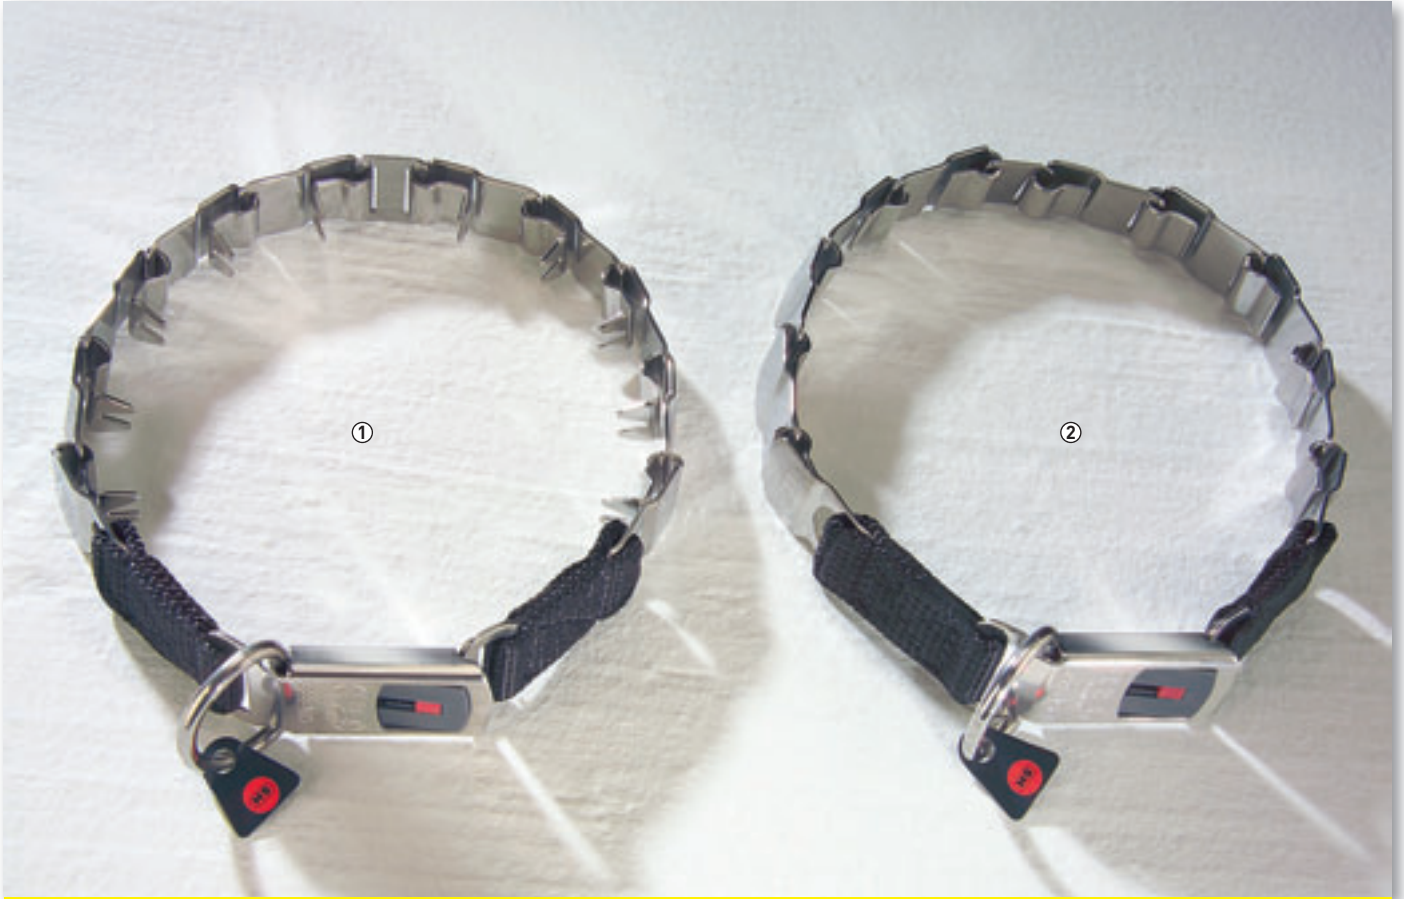

Premium-Quality  
in Precious Design

## Stylish Design for *Fun* without function

- The manufacturing of all Neck-Tech varieties occurs from the materials stainless steel and Curogan.
- The high strength and longevity is achieved by punching the single elements out of massive metal band.
- All components: Neck-Tech links, buckles & rings are guaranteed stainless.
- Attractive & unique design
- This type of chain is suitable for all dog breeds and crossbreeds.
- Especially handsome upon short- and medium-length fur
- **Make your collar unique!**  
Combine as desired stainless steel, stainless steel black and Curogan or also "*fun*" and "*sport*" together. (see page 9).

NeckTech *Fun* is available in following styles: **STAINLESS STEEL BLACK, STAINLESS STEEL, CUROGAN.**

# NeckTech<sup>®</sup> sport

Premium-Quality  
in Precious Design

Neck-Tech "Sport" imitates the fang teeth of a dog, thus resulting in the following advantages:

- This type of chain has a natural influence onto the dog.
- A communication is achieved, which the dog understands and will react upon sensibly.
- This achieves harmony and confidence between dog and human during the educational phase.
- The Neck-Tech offers a pleasant wearing comfort for short- and long haired dogs. On extremely long haired dogs the intensity of the influence is reduced.
- If wanted, single elements of "sport" can be replaced by elements of "fun" collar, through which very precise, accentuated work with the dog is made possible.

NeckTech Sport is available in following styles: **STAINLESS STEEL BLACK, STAINLESS STEEL, CUROGAN.**

Very simple adjustment of the leash!

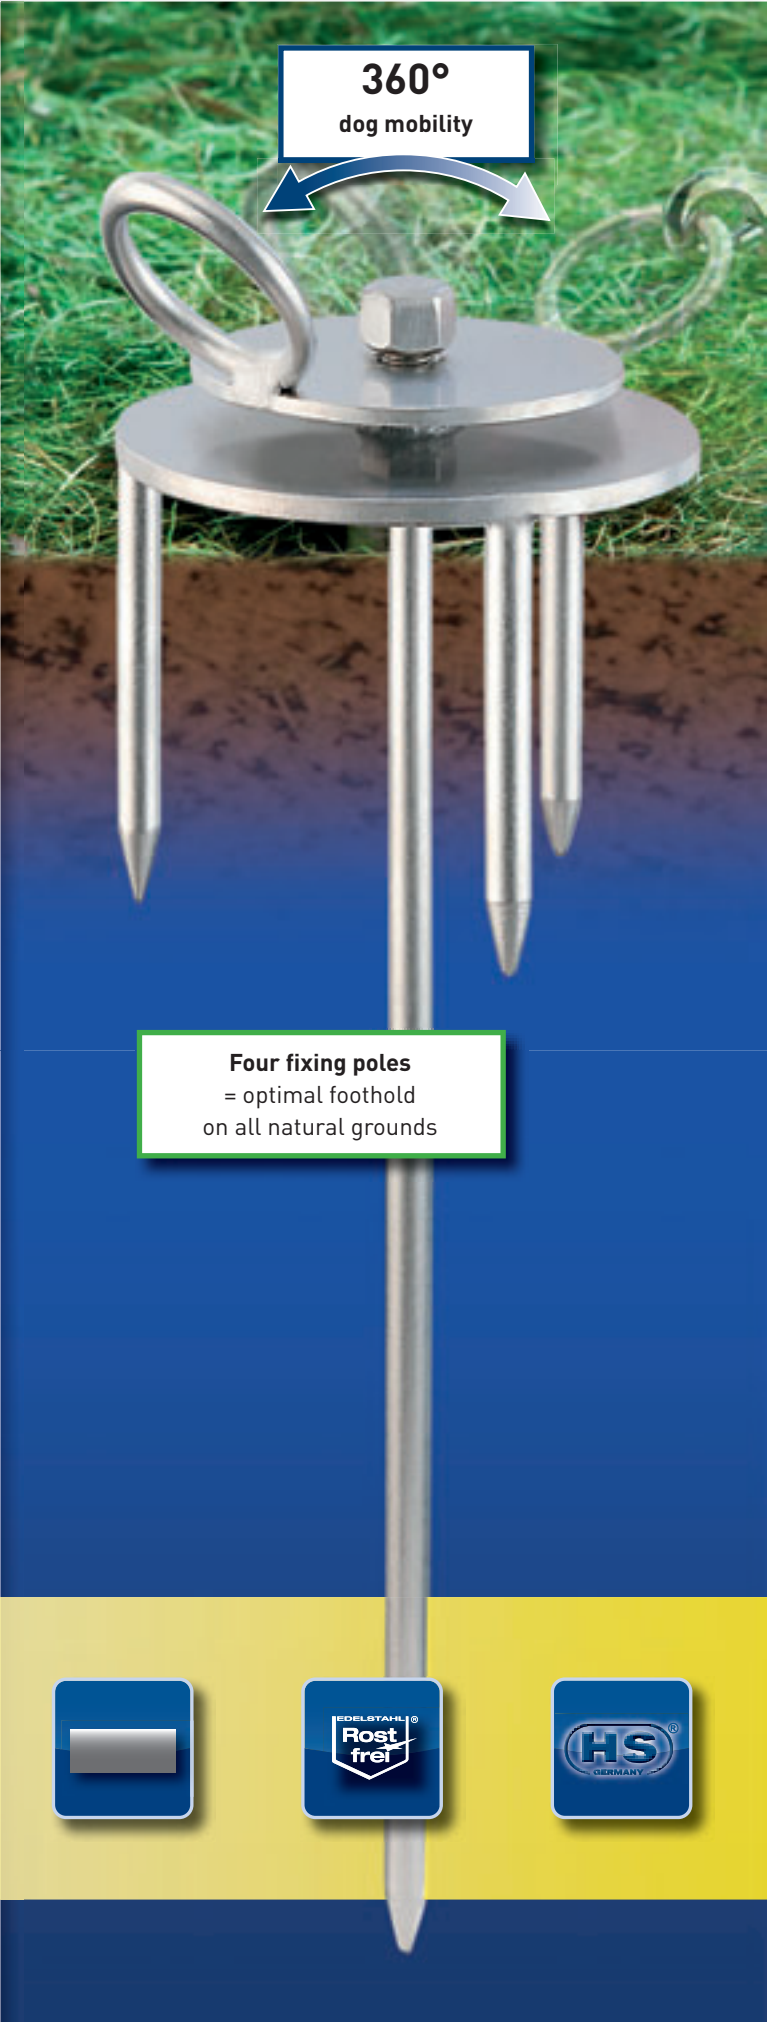

# Run-Block

The perfect interplay between mobility, sturdiness and superior quality!

The run-block provides dog clubs, trainers and private dog owners with the following advantages:

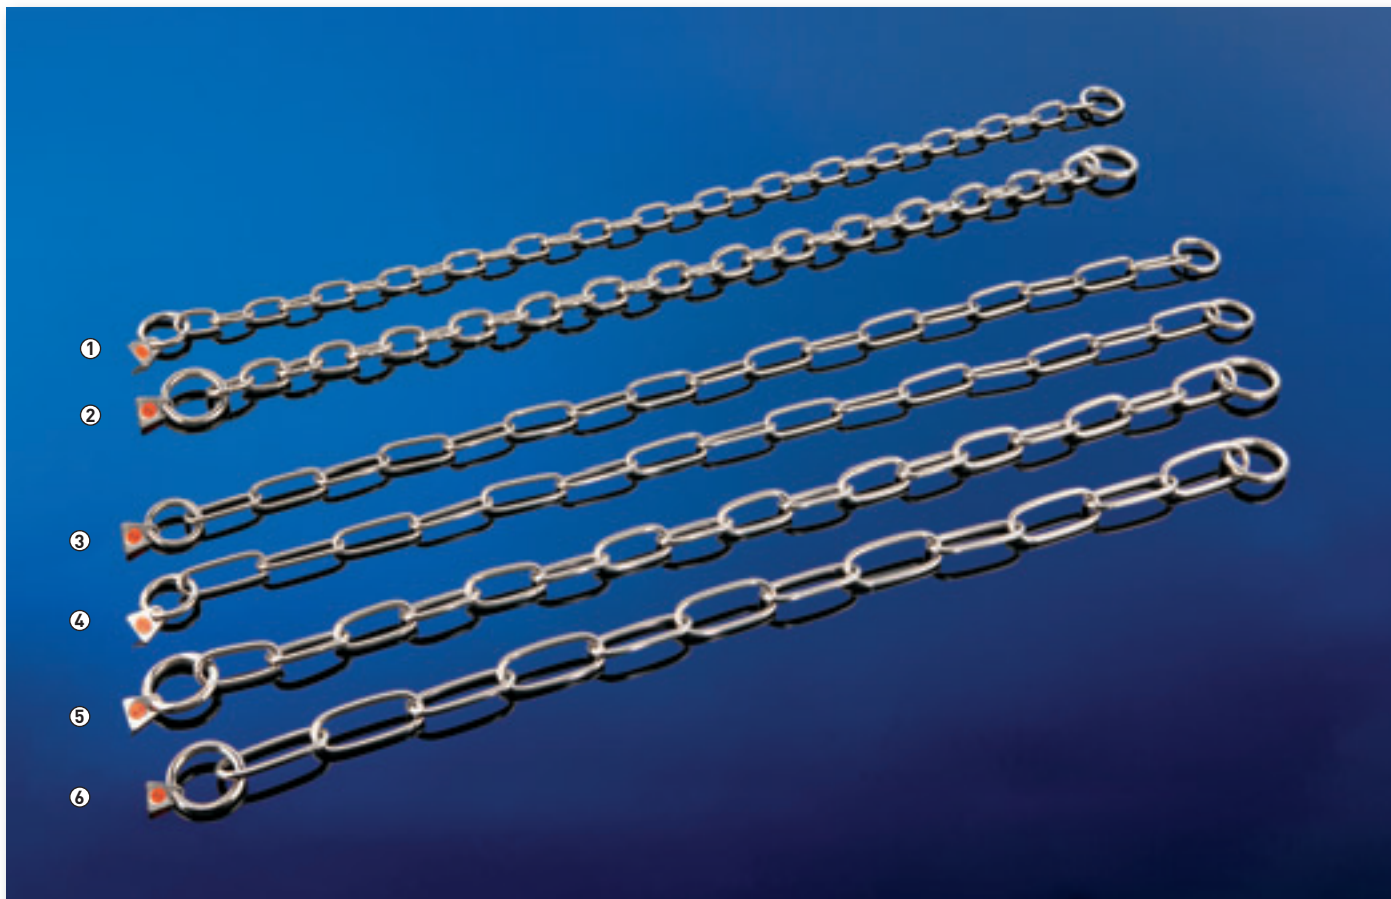

- safe outdoor-leashing of the dog
- 360° dog mobility in a radius of the leashe's length
- spatial flexibility
- easy ground attachment by using the personal body weight or an ordinary hammer
- adapted for nearly every natural ground
- three additional fixing poles for stabilizing the block
- remain stable in-ground while extreme stressable
- outstanding longevity
- all components are made of solid stainless steel
- article-no. 55991 000 55

360° dog mobility

Four fixing poles = optimal foothold on all natural grounds

# Training Collar

**We rely upon highest quality - for the safety of your dog.**

**INFO:** Dog training should be based upon an active, joyful and independent cooperation of the dog. A learning process consisting of the least possible stress for the animal calls for a patient training without punishment or force as well as a large expenditure of time.

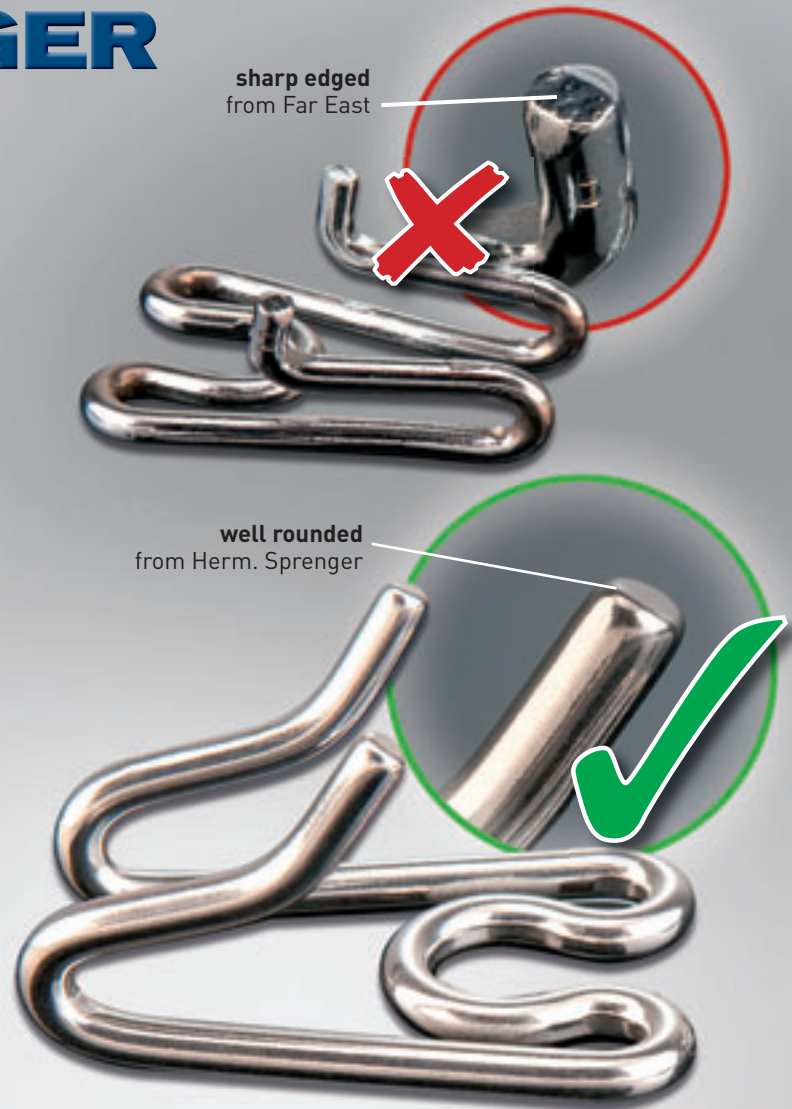

Surely there are reasons for one or another, which speak against the use of a training collar. Although this training tool which has unfortunately falsely fallen into disrepute, can help to correct inappropriate behaviour when used by an expert. Furthermore the use of the training collar obtains security to what has been trained.

The use should be solely temporary. Permanent use may lead to desensitisation and thus negatively influence achieved learning success. The training collar is a powerful training tool which belongs into expert hands!

In the professional "Schutzhund" training of police and Military K9's, our products belong to the daily training. Especially these institutions value the use of high-grade products of consistent quality. For this reason, the training collars from Herm. Sprenger are used in this field and offer large safety for the animal, the dog handler as well as for the civilian.

Concerning development and production of their products, the Herm. Sprenger GmbH puts its focus on the highest grade with consistent quality, to minimize health risks and not to be a risk of injury for the dog. For this purpose, we supply training collars with rounded tips and award tensile strengths for each quality of each type of chain or rather thickness. To be able to maintain the principle of consistent quality, Herm. Sprenger produces solely at its factory location in Iserlohn, Germany.

Unfortunately, there are numerous products made in countries with a low-wage economy on the markets, which often have low and inconsistent quality. Thus they represent a very high level of

risk. Many of these training collars hold a high risk of injury for the dogs caused by unprocessed and thus sharp or rather pointed cut edges. These facts should be closely considered before purchasing these training tools.

The criticism concerning training collars is not only reinforced by the import of low-grade products. Partly responsible for this development are also the "black Sheep", which modify the products in a way that they become dangerous!

# ULTRA-PLUS

## The training collar for professional dog training

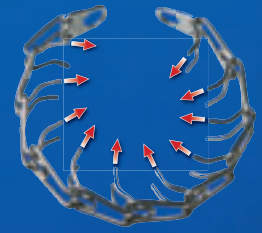

Our training collars are an effective training aid for the professional education of dogs by expert trainers.

In our production we find it especially important to use products of high and consistent quality. To us, safety for the animal and the human being comes in first place.

To minimize health risks and not to be a risk of injury for the dog, we supply training collars with rounded tips and award tensile strengths for each quality of each type of chain or rather thickness.

**New:**

- with new center-plate (patent pending)
- synchronous order of the middle links
- equal pressure
- optimized communication with the dog
- all Sprenger training collars are available solely in the optimized version Ultra-Plus

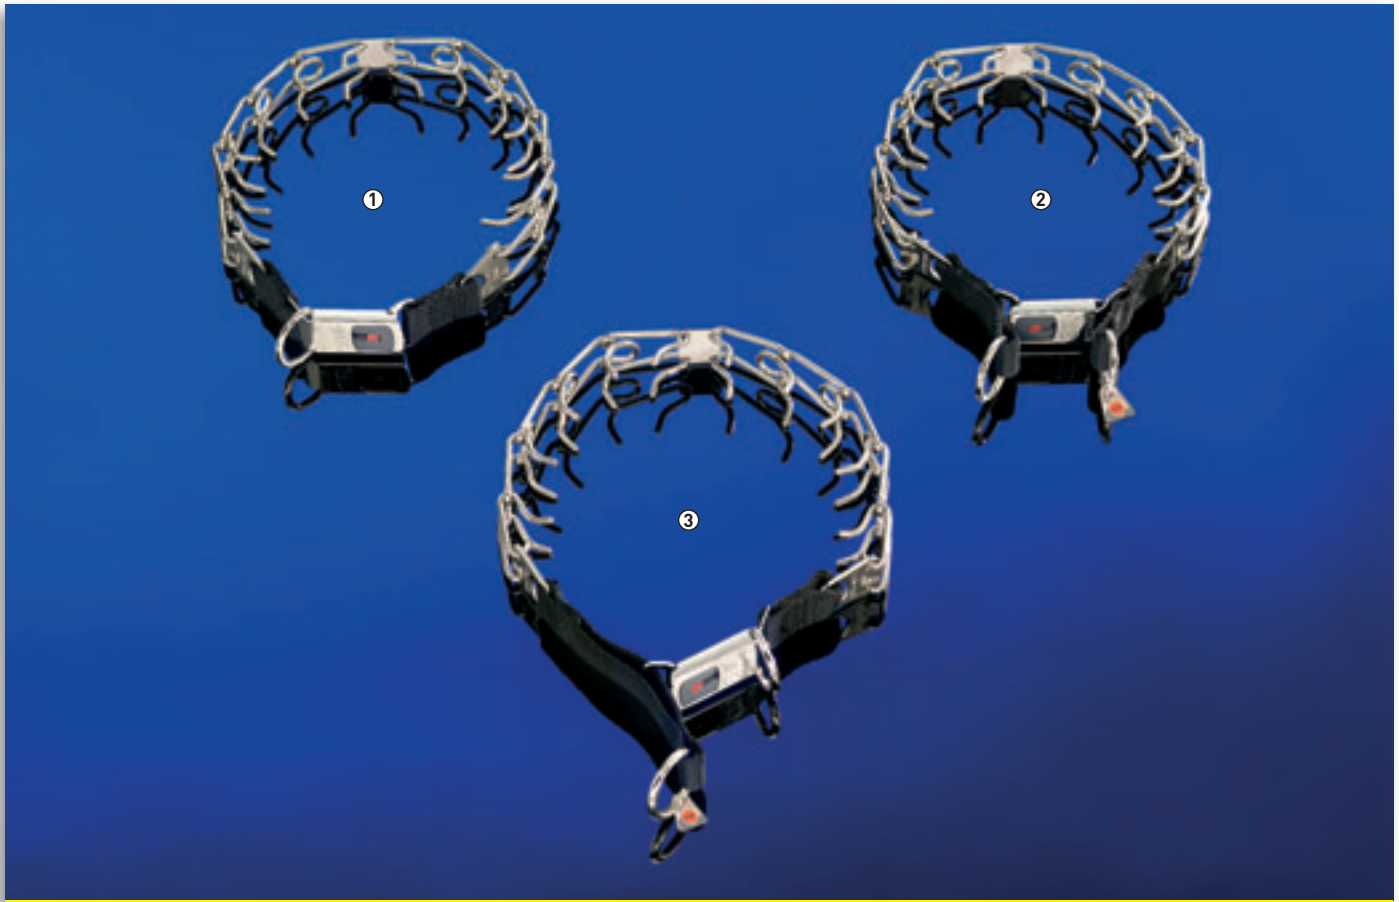

**Ordinary training collar**  
= Imbalanced influence onto the dog

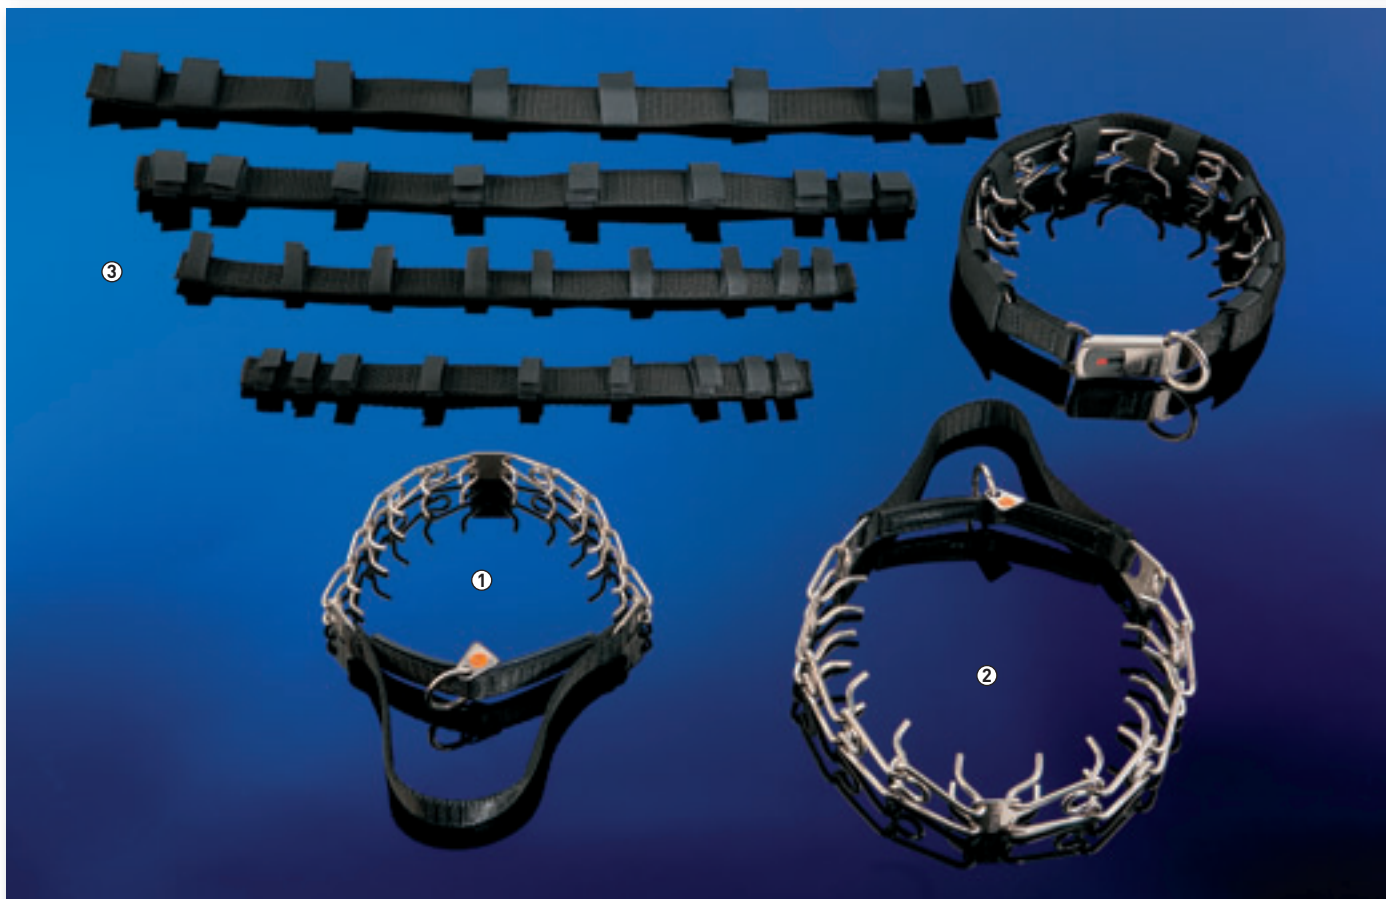

**Uniform Influence**  
= Enhanced communication with the dog

**Patent Pending**  
**HS SPRENGER**  
**ULTRA-PLUS**  
Only available from Sprenger!
